

DURA II Air Conditioning System Flush

PSP - Problem Solving Parts

Problem: "How can I ensure my a/c repair starts with a clean system?"

SOLUTION!

Dura II

What is Dura II?

Dura II is a powerful non-flammable degreaser with more than enough horsepower to dissolve oils and other contamination typically found in a failed A/C system. Because it is dense and has low surface tension, it lifts microscopic particles of dust and carbon and drives them out of the system.

Fast drying, it evacuates from the system in minutes without residues.
